

OWL LABS

FOCUS THEIR ATTENTION FROM ANYWHERE

Presenter Enhance makes it easy to lead meetings, classes, and presentations by focusing the camera on the primary speaker.

Powered by Wise OS™, Presenter Enhance is a Meeting Owl Pro feature that follows one speaker, so presenters can move around the room or take notes on the whiteboard while keeping the Meeting Owl Pro focused on them.

KEY BENEFITS

- Allows teachers and speakers to present in their natural style without worrying about if the camera is on them
- Splits the screen between the primary speaker and an active participant when an in-room attendee begins speaking
- Focuses remote-attendees attention with 360° of automatic zoom
- In classrooms and meeting rooms with frequent lectures and presentations, Presenter Enhance can be selected as the default setting to simplify setup

FEATURED IN
